Professional Summary

Mobile App Developer with 2+ years of hands-on experience in full-cycle development of cross-platform applications using React Native. Skilled in building scalable mobile solutions, integrating RESTful APIs, and implementing responsive UI components. Proficient in mobile architecture, state management, and third-party integrations. Strong background in **Agile methodology**, team collaboration, and technical **problem-solving**. Available immediately for both on-site and remote opportunities.

Technical Skills

- **Languages:** JavaScript, HTML, CSS

- **Frameworks & Libraries:** React Native CLI, Expo, React.js, Redux Toolkit, WebSocket.io

- **Platforms:** Android (Java/Kotlin), iOS, Web

- **State Management:** Redux Toolkit, Context API, Redux

- **CI/CD & Deployment:** Jenkins, TestFlight, App Store, Google Play Store

- **Version Control & AI Tools:** Git, GitHub, ChatGPT, GitHub Copilot, Cursor.AI

- **API & SDK Integrations:** REST APIs, Stripe, Firebase Crashlytics, In-app purchases, Google Maps API, Twilio

---

Professional Experience

Software Engineer
Sofmen Technologies | Jan 2023 – Apr 2025

- Worked on cross-platform mobile and web app development with a focus on performance, scalability, and clean UI/UX.

- Collaborated within **Agile teams**, participating in code reviews, and daily stand-ups.

- Maintained code repositories using Git and managed integration pipelines using Jenkins.

- Integrated third-party APIs, SDKs, and push notification services using Firebase.

- Resolved performance bottlenecks and ensured smooth user experiences through effective **problem-solving** and debugging.

- Ensured unit testing and code quality for reliable and maintainable applications.

Projects:

Tracker App

- Developed the front end of an employee tracking and attendance management app using Kotlin.

- Integrated WebSocket for real-time location tracking and built offline functionality with background sync.

- Added Firebase for push notifications and crash reporting; deployed the app on Google Play Store.

The Mandarin Show – Language Learning App

- Built a cross-platform React Native app for Mandarin language learning with secure Google/Apple login.

- Integrated video playback using ExoPlayer and gated content via in-app purchases (IAP).

- Emphasized intuitive user experience, secure access control, and reusable components.

Curbside Movers – Customer & Driver Apps

- Led development of customer and driver-facing mobile applications using React Native and React Native Web.

- Implemented core features like real-time driver tracking, time slot booking, communication via Twilio, and payment integration via Stripe.

- Integrated Google Maps API, Firebase services, and maintained modular code structure for maintainability and reuse.

Education

B.Tech – Electronics & Communication Engineering
Sagar Institute of Research and Technology, Bhopal, M.P | 2021

Additional Information

- Adaptable and quick to learn new technologies and frameworks

- Strong documentation skills and attention to detail

- Open to remote and hybrid work; available to join immediately
